

Case Study

Name	Cairndow Hydro Scheme
Capacity	Screening
Project Type	Hydro

Overview

Atmos Consulting provided screening and planning advice for this proposed hydro scheme at Cairndow, Argyll and Bute.

Site Conditions

The proposed scheme would consist of:

- A channel and penstock to a header storage pond;
- A 3.3 km approx. penstock;
- A drainage leat to capture water from two additional catchments
- A turbine house with a 980 kW turbine

Services Provided

Atmos Consulting provided planning advice to the scheme and successfully screened the site with Argyll and Bute council as a non-EIA scheme.
